

# What is Market4Diamonds.com?

The main purpose of this marketplace is to provide a fully safe environment for all transactions between the Buyers and the Sellers.

Market4diamonds.com gives people an opportunity to transact in a fast and safe way.

## How does the market work?

It works similar to Olx, Allegro, Otomoto, etc. In other words it gives us a way to buy and sell.

In this particular case we talk about diamonds from the game called „More Diamonds”.

We simply make an offer to sell a particular number of diamonds, and we inform potential Buyers about our offer. Market4diamonds operates in two ways:

### 1st way is a sale using the ref link.

In this scenario somebody has 5000 diamonds and he puts them on sale. He has a unique ref link (ref code) to his account in the marketplace and he uses this ref code on his blog, YouTube channel, website, Facebook, etc. If somebody decides to purchase e.g. 1000 diamonds then he will be able to do so even at 3am without contacting the buyer. 1000 diamonds mentioned above will be simply taken from this Seller's balance. The Buyer will receive his 1000 diamonds and the Seller will still have 4000 diamonds left on his balance after this 1000 will be deducted. The Seller will receive funds from the sale of his 1000 diamonds minus a fee charged by the marketplace within 1-2 business days.

Currently over 85% of all transactions at Market4Diamonds.com are the ones with ref link (ref code) being used.

### 2nd way is the sale using the „public pool”.

In case when the Buyer doesn't have any ref link (ref code) to use while he creates his account at Market4Diamonds.com (or the Buyer he signed up with doesn't have any diamonds on his balance) we talk about the sale of diamonds from the „public pool”.

In this case system takes 10 diamonds from every active Seller having some diamonds on the balance available for sale.

Let's show how it works on a simple example...

When somebody purchases 150 diamonds from the „public pool” the system will take 10 diamonds from 15 Sellers. The Buyer will receive his 150 diamonds and funds will be distributed between these 15 Sellers that participated in this particular transaction.

Currently only about 15% of all transactions at Market4Diamonds are the ones associated with the „public pool”.

## How long do I have to wait in order to sell my diamonds?

In case of sale using the ref link, it's only a matter of how fast the Buyer who received your ref link (ref code) will make his purchase.

All the transactions at Market4Diamonds.com are processed in the realtime therefore funds are also transferred immediately.

In case of sale using the „public pool”, it depends on the current number of active Sellers and the total number of diamonds being offered for sale from the „public pool”.

## How to become a Seller at Market4Diamonds.com?

1). Please go to VERIFY ACCOUNT then fill in the form and send it.

2). Please make a verification transfer of funds from your bank account to the account that belongs to Market4Diamonds.com in order to verify your personal information we have on file.

Verification fee of 10 PLN (or 2 EURO) is not refundable.

All the details required for making a bank transfer are available inside VERIFY ACCOUNT section.

Please make sure to insert a unique ID assigned to your account at Market4Diamonds.com in the „Title” section of your transfer as we have to know which account on the market belongs to you.

Market4Diamonds.com processes payouts in PLN and EURO.

## How long does it take a verify a bank account?

Verification of the account takes between 1-2 business days from the moment we receive your verification transfer of funds (as per the details of our instruction available after clicking **VERIFY ACCOUNT**).

Please note that it is also required to fill in all the fields with your personal information present inside the form available in **VERIFY ACCOUNT** section.

## Deposits and withdrawals of diamonds.

After each purchase diamonds are available on the balance at Market4Diamonds.com. If you would like to transfer the diamonds to your account in the game, then please click **WITHDRAW DIAMONDS** button and follow the instructions in order to generate a code to use inside your app. Finally you should go to the Gig Warehouse in the game and use the code generated to **ACCEPT** the diamonds.

Deposit of diamonds at Market4Diamonds.com is only available for verified Sellers. If you would like to deposit some diamonds on the marketplace, you should use **DEPOSIT DIAMONDS** option. Obviously you should first generate a proper code inside the Gig Warehouse in the game using the **TRANSFER** button. This way we transfer diamonds from the game to the marketplace.

Please note that such transfer doesn't mean the sale itself. This way we only confirm the number of diamonds we would like to sell.

Diamonds available on your balance at Market4Diamonds.com can be withdrawn at anytime.

## How long does it take to receive the money from the sales of diamonds?

Market4diamonds.com closes the sales from each day at 00:01.

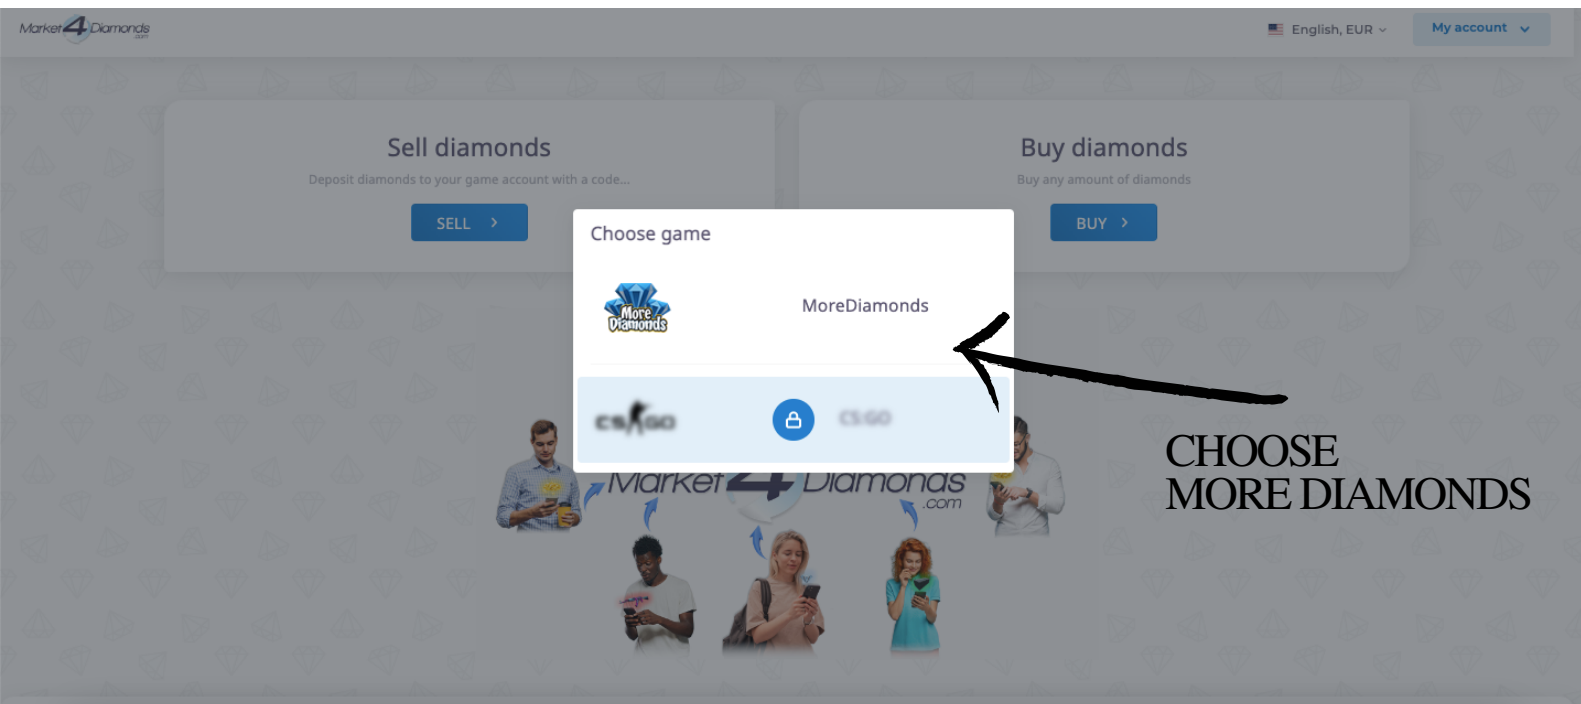

All accumulated funds are then automatically paid out within 1-2 business days..

## Fees for bank transfers

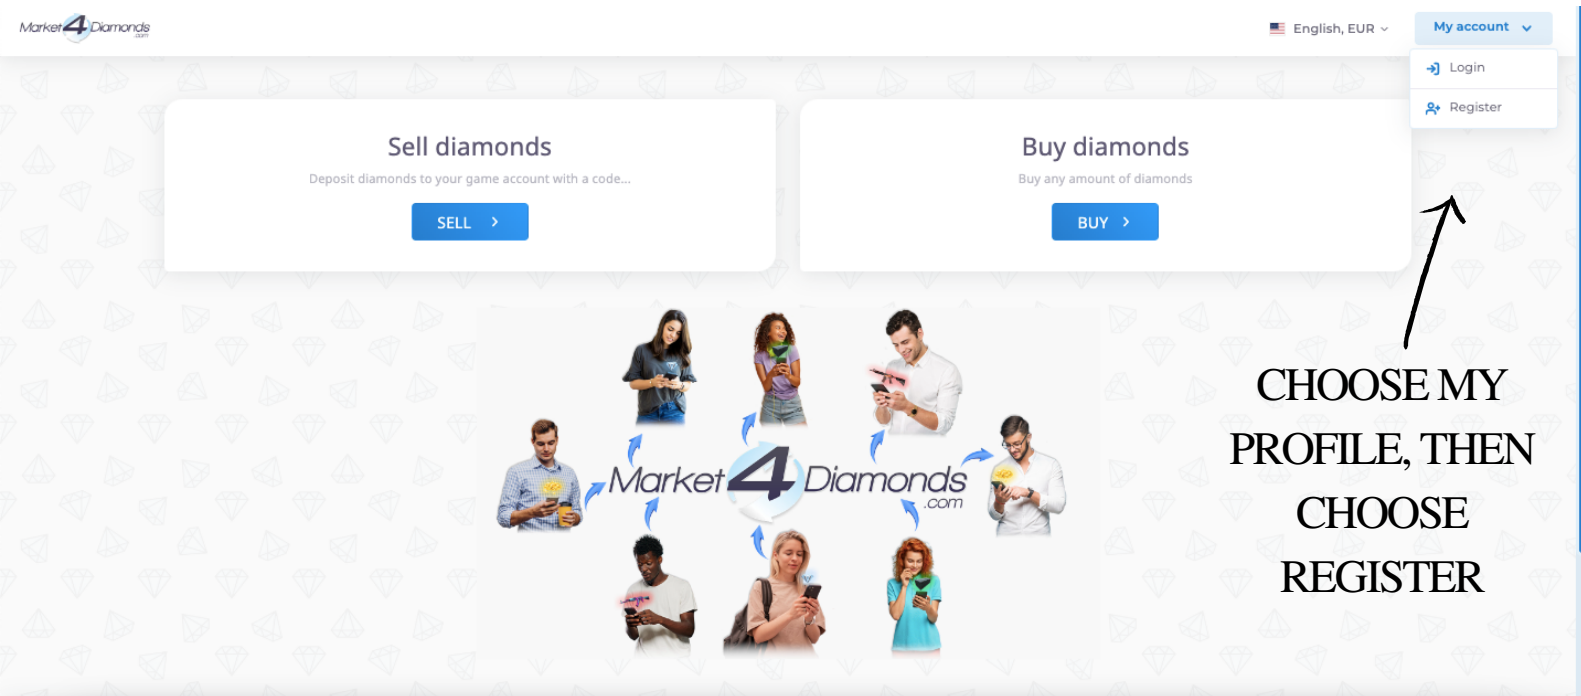

Market4Diamonds.com charges a small fee for every bank transfer.

It's 1 PLN for every transfer of funds in PLN and 2 EURO when bank transfer is made in EURO.
